Professional Summary

DevOps-focused Computer Engineering graduate with hands-on experience in AWS cloud services, CI/CD pipelines, containerization, and infrastructure automation. Skilled in building scalable cloud infrastructures, automating deployments, and implementing security best practices. Proficient in DevOps tools, including Docker, Jenkins, Terraform, and Kubernetes. Strong foundation in networking, cybersecurity, and cloud infrastructure management with additional expertise in UI/UX design.

Technical Skills

Operating Systems:	Amazon Linux, Ubuntu, Windows, macOS
Cloud Platforms:	AWS, Azure, GCP
DevOps Tools:	Git, GitHub, Jenkins, Docker, Kubernetes, Terraform, Ansible
CI/CD:	GitHub Actions, Jenkins Pipelines, other tools
Networking:	TCP/IP, DNS, Subnetting, VPN, Load Balancing, Firewalls
Scripting & OS:	Bash, Linux, Python
Monitoring:	CloudWatch, Prometheus, Grafana
Security:	IAM, Security Groups, Basic Cybersecurity Concepts
Other:	HTML, CSS, JavaScript, SQL, Figma or other tools

Professional Experience

DevOps Trainee	CloudBlitz Institute, Pune	July – Pursuing
-----------------------	-----------------------------------	------------------------

- Training in DevOps methodologies, cloud infrastructure, and automation tools.
- Gaining practical experience in CI/CD pipeline implementation and container orchestration, e Learning infrastructure as code principles using Terraform and configuration management with Ansible.

UI/UX Design Intern	CodSoft IT Services	Jan-Feb 2024
----------------------------	----------------------------	---------------------

- Conducted user research and developed user personas to improve usability.
- Designed user interfaces and created interactive prototypes using Figma.

DevOps Projects

AWS Infrastructure Deployment	Devops, AWS, Linux/Ubuntu (2025)
--------------------------------------	---

- Deployed and hosted a static website using EC2 instances and S3 buckets.
- Implemented IAM roles and policies for secure access control.
- Configured basic monitoring and alerts using AWS CloudWatch.

CI/CD Pipeline Automation	Jenkins, Docker, GitHub Actions(2025)
----------------------------------	--

- Automated code testing and deployment using GitHub Actions, Containerized applications using Docker for consistent deployment, and implemented automated build and deployment processes

Other Technical Projects

Evil Twin Wi-Fi Hacking Device **Cybersecurity** **Feb. 2025**

- An Evil Twin Attack is a specific type of man-in-the-middle (MITM) attack wherein a rogue access point (AP) is created to impersonate a legitimate Wi-Fi network.
- The malicious AP mimics the Service Set Identifier (SSID), signal strength, and sometimes even MAC address of the original network.

Student Project Tracking System **HTML, CSS, JS, SQLite, AWS, Docker** **Sept. 2025**

- Built a web-based system to track student projects from initiation to completion with separate views for students and mentors.
- Designed and implemented the full backend in SQLite, including entities for students, mentors, project status, and milestones.
- Containerized the application with Docker and deployed it on AWS, integrating basic DevOps practices for building, hosting, and updating the service.

Education

BE Computer Engineering	Navashyadri Group of Institute, Bhore - SPPU, Pune	2025
Higher Secondary (HSC)	Shri Dhokeshwar Junior College, Takli Dhokeshwar	2021
Secondary (SSC)	Shri Hareshwar Vidyalyaya	2019

Certifications

- Cloud DevOps Engineering Course with AI – CloudBlitz — Powered by Greামী (Ongoing)
- AWS Cloud Practitioner Essentials certification – AWS Training & Certification (2025)
- Sunbird ED Speciality Certification – Oracle Cloud Infrastructure (OCI) (2025)

Achievements

- **Rising Star Award** — Recognized for innovation and leadership at college gatherings.
- Published Author ”**The Essence of Design**” (Available on Amazon & Flipkart).
- **Founder of NISTJ** — Multi-disciplinary research publication platform
- **National Service Scheme (NSS)** Volunteer-led community service initiatives.
